Transforming Education

Introduction, VM & Affiliation

Since its establishment in the year 1997, the College of Business Management (CBM) has strived to provide quality education in the field of management to the students of Nepal in the high school or +2 level. We took on this educational voyage with the vision of making Nepal an educational hub for entirety of South East Asia for new management and technology education, philosophies, and a holy destination for monks of knowledge.

Our mission is to establish management and technology-oriented education hub in Nepal that can deliver perfect symmetry of practical, conceptual, and behavioral education at a fair price. To achieve our vision, we plan to fulfill needs of the day by being technologically empowered with time. The infrastructure of school, our pledge to maintain futuristic perspective and adaptation of teachers, equipped with modern technology along with engaging pedagogy and

innovative teaching methodology shall be a differentiating value of our institution.

The +2 curriculum at CBM is the most relevant in Nepal and internationally recognized as a high-school degree in the field of management. Currently located at Dillibazar, Kathmandu, CBM is diversifying itself and is moving towards its goal of value-based education. The supporting pillars of this institution is a team of highly qualified individuals with expertise in the areas of Business, Economics, Management and Accountancy.

Come 2020, CBM is still on the journey under the steady guidance of the Nepal Education Board (NEB). Additionally, we are running the BBM, BBS, and MBS programs under the affiliation of the prestigious Tribhuvan University (TU).

Academic Director's Message

We are trying to bring a transformational learning experience to the young mind through a blend of practical and theoretical knowledge, skills, and practice for analytical decision-making ability among the youth. We believe in making the best among young minds to lead a better life for the society. We believe in a method of teaching and learning where students can apply everything that they can absorb from their classes.

Everything from the basics of business terminology to mathematical equations are pieces to the bigger puzzle of entrepreneurship and career development. Therefore, CBM believes that we must always enable and encourage its students to apply their knowledge in hypothetical as well as real business scenario.

Ajay Shah
Academic Director

Teaching Methodology

Here at CBM, we follow a student facilitation approach to teaching and believe that education is incomplete unless it is applied. This is why our students are encouraged to take proactive steps towards realizing the real-life applications of their course content. Today's schooling is not all about books and classes; it's about creating educated Human Beings and developing civilized, social, literate and successful citizen of future. The aim of our teaching methodology is to amalgamate both traditional and modern facets so that they can cope with the contemporary world and also be able to take Nepal into the coming decades, and bear their mark to make themselves distinguished in the crowd of millions.

Hence, throughout their 2-year course at CBM, the students will engage in numerous extracurricular and co-curricular activities within and outside the college aimed at grooming their personality, professionalism, character, and overall analytical skills.

Exposure

As dictated by our teaching approach, we strive to give our students experience through real world exposure that enhances critical and analytical thinking. The program designed by college inculcates various extracurricular and co-curricular activities both inside and outside the college premises that are primarily focused on physical, mental and cognitive well-being. The engagement activities like sports, workshops, excursions, and skill development sessions like presentations, case analysis, education-focused competitions, and group discussions will be facilitated to achieve those goals.

Furthermore, experts from many fields of business and entrepreneurship like entrepreneurs, investors, finance managers, chartered accountants, bankers, business owners, and social workers shall share their experiences through talk sessions, workshops, symposiums, and training seminars which will act as a foundation for shaping students' development.

Besides the educational portion of extracurricular activities, the college also hosts several sporting events that helps students practice not only effective management but also healthy living. Currently, we have included games such as basketball, football, cricket, table tennis, chess, and badminton in our sporting events.

The economy of Nepal has a humongous gap in the labor market. Even though there are a plethora of colleges offering the same curriculum, the number of competent middle and lower-level managers is few and far between. To fill that gap, CBM uses a practical approach to make its students learned and experienced in whatever area of management that they wish to explore.

Programs

Under NEB and TU, CBM is running a total of four programs; +2, BBM, BBS, and MBS. In +2 program, we are offering a range of courses that are crucial for the career development of the students in the future. They are designed to complement one another. The subjects for the +2-management program are:

Secondary Education (Class 11-12)

Grade XI	Grade XII

Total	27	27
Optional (Additional)	5	5

The CBM Lifestyle

During the course period of 2-years, the regularly updated courses and teaching methods in CBM will aid the students in learning about the core subjects of management and business. The regular educational events will sharpen the analytical and problem-solving skills of the students while awarding them with an enhanced perspective on business, management and entrepreneurship.

The approachable teaching staff and facilities illuminate the paths that the students must take to become successful managers and entrepreneurs. The inclusive ambience of CBM ensures healthy competition and constructive criticism among peers. Furthermore, positive interaction between multiple disciplines of study like computer science and Hotel Management will open up new avenues for exploration.

Principal's Message

I want to extend my sincerest congratulations to the students who passed SEE with flying colors and welcome them to CBM on behalf of our management team through this column. CBM is one of the best educational institutes in Nepal that strives to provide quality education in the field of management.

Our approach to teaching at CBM encourages original ideas and a proactive outlook that preserves and enhances the essence of business. We strive to challenge conventional wisdom through meticulous learning and empower our students to change the way the world does business.

In a report by the Chartered Management Institute, they mentioned that 70% of employers believed that students should study modules that specialize in hard and soft skills such as entrepreneurship, leadership, and management.

The report is a statement of demand from the market. It dictates that the business world requires personnel with leadership, communication, problem-solving, decision making, analytical and planning skills. CBM wishes to provide that and much more.
